

# BlueStar US Machine Learning and Quantum Computing Index

The index of US listed equities or companies pioneering in the development or use of quantum computers, or whose products and services are required for machine learning based on traditional computing. Companies considered for inclusion for their relation to quantum computing may be involved in the development or production of: quantum computers or quantum computing chips, superconducting materials, or applications built on quantum computers. Subset of BQTUMTR.

## Key Features

All Time High/Low      52-Week High/Low

Total Return Net Index    514.14/86.67                      514.14/304.46

### Size and Liquidity Requirements

Float-adjusted market capitalization of at least 150 mIn USD. Six-month average-daily-value-traded of at least 250 k USD.

### Universe

Companies have to offer products or services related to quantum computing or machine learning technology, and be US listed.

### Diversification

Companies are equally weighted.

### Review

Semi-annual in June and December.

## Index Data
