

**MVIS and Amun Launch the Amun Bitcoin Suisse Crypto Index**  
***Designed to Track a Composition of Bitcoin and Ether***

Frankfurt (03 October 2019) – [MV Index Solutions \(MVIS\)](#) and Amun together with their partner Bitcoin Suisse, two of the leading Swiss-based companies in the crypto financial services space, are launching the [Amun Bitcoin Suisse Crypto Index](#) (ticker: ABBA), a digital assets index designed to accurately track Bitcoin and Ether, the top two digital assets with the largest market capitalization of cryptocurrencies. The respective product (Name: Amun Bitcoin Suisse BTC/ETH ETP, Ticker: ABBA) starts trading today on the SIX Swiss exchange.

The [Amun Bitcoin Suisse Crypto Index](#) tracks the performance of Bitcoin and Ether, the top digital assets in terms of market capitalization and liquidity. In August 2018, MVIS and Amun already launched an index which was used as underlying for the Amun Crypto Basket Index ETP, the world's first exchange listed crypto ETP.

“We are excited to launch the second index with our partner Amun,” said Thomas Kettner, Managing Director at MVIS. “It’s our first index in CHF and especially designed to serve the Swiss market which has been demanding such an index. We believe it will be as successful as the first product. It reflects the current dominance of Bitcoin and Ether in the crypto market.”

“The Amun Bitcoin Suisse BTC/ETH ETP was designed for the Swiss by the Swiss. It represents a unique way for investors to add the two major cryptocurrencies globally to their portfolio via a regulated product listed on SIX exchange and backed by a Swiss-based custodian,” explains Hany Rashwan, Chief Executive Officer at Amun. “This product further exemplifies Switzerland’s leading position in the crypto space, where Amun is able to work closely with its partners, the exchange and authorities to create regulated, compelling, and institutional-grade financial products.”
